

Technician Licensing Class – January 2026

We are pleased to invite all interested to attend a FREE ham technician license class. Please invite friends, family, and anyone interested in radio. This course covers the basics of radio operations and functions. It applies beyond just the Amateur Radio Service.

The course is designed to prepare individuals to successfully pass the FCC license exam. We will be providing an exam on February 4, 2026 for those who desire to obtain their license immediately after completing the course.

The Course occurs over 4 weeks in January (7th, 14th, 21st, and 28th) from 6:00 pm until 9:00 pm.

This hybrid course is offered in-person at Weber State University at the Noorda Applied Engineering Building tentatively in Room 304 on the third floor.

Additionally, from the classroom the course will be streamed using the Zoom platform. Due to Non Disclosure agreements with the content provider, we are only able to stream live during the class. The zoom link follows and is the same link for each week of the course. The zoom link will be activated approximately 1/2 hour prior to each class in January.
