

How to RENEW your FCC License

These instructions come from the FCC at:

<https://www.fcc.gov/wireless/support/knowledge-base/universal-licensing-system-uls-resources/how-obtain-official>

Click on the log-in link and use your FNR and Password to login.

It may take a minute, but the next screen should show your licenses

Click on your call sign.

On the left side of the screen is a menu option under My Licenses that says “Renew Licenses”

If your call sign is not shown on the Left Hand box, check your expiration date to see if it is eligible for renewal. If you try to renew too early, the box may be blank.

If your call sign is in the left hand box, highlight the call sign and click the add arrow that points to the Licenses to Renew box then Click Continue at the bottom right hand side.

As I have not had to renew my license and it is too early, I am unable to complete the process and document any further at this time.

Hopefully you can follow the prompts to successfully renew your license. I would be happy to follow along with someone to complete the documentation.

As with most FCC interactions, getting to the point of finding where to start the renewal process is usually the most challenging.

Good Luck !!
